EDUCATION

Bennett University

B.Tech in Computer Science and Engineering

2023 – 2027

CGPA: 8.45

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL

Frontend: HTML, CSS, React, Next.js, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, RESTful APIs, GraphQL, Microservices

Databases: MongoDB, PostgreSQL, MySQL, Firebase, Convex, Redis

DevOps & Tools: Docker, Git, GitHub, Postman CI/CD, AWS

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Software Engineering

WORK EXPERIENCE

Raahi

August 2025 – September 2025

Backend Developer Intern — Remote

[Live](#)

- Architected scalable backend using **Next.js** and **Firebase**, handling concurrency for **1,000+ active users**.
- Enforced security via **Firebase Auth** & custom **OTP logic**, restricting access to verified university domains.
- Engineered core **booking logic** for ride matching, fare calculation, and instant transaction updates.
- Deployed low-latency in-app chat using **Firestore streams** to enable rider-driver coordination.

Zonomo

May 2025 – July 2025

Database Developer Intern — Remote

[Live](#)

- Developed **appointment service** using **Next.js** and **Firebase** to automate scheduling, **state tracking**, alerts.
- Engineered a **real-time negotiation** service using **Firestore listeners**, syncing price updates across client sessions.
- Built **real-time chat functionality** connecting customers and service providers for booking coordination.

PROJECTS

AgentFlow

[GitHub](#) — [Live](#)

Next.js, React Flow, TypeScript, Convex, Clerk, Arcjet, Google Gemini, Tailwind CSS

- Built a **no-code** AI agent platform addressing standard chatbot limitations by enabling custom API calls and conditional logic through a visual drag-and-drop interface.
- Designed and built a visual workflow platform with dynamic variable handling and real-time state persistence using **React Flow** and **Convex**.
- Integrated **Google Gemini SDK** for auto-prompt generation, live chat testing, and exportable code snippets.
- Integrated authentication and payments using **Clerk**, with **Arcjet** rate limiting for security.

INVIEW.AI — Built in 24hrs Hackathon

[GitHub](#) — [Live](#)

React, Next.js, TypeScript, Gemini, Vapi AI, Firebase, TailwindCSS

- Built AI-powered voice interview platform with **Next.js** and **Firebase** for role-based mock interviews.
- Integrated **Gemini AI** to generate dynamic, contextual questions based on job roles and candidate responses.
- Implemented **Vapi AI** for real-time voice-to-voice conversation enabling authentic interview simulation.
- Built automated feedback system analyzing responses and providing personalized suggestions.

Renewly-API

[GitHub](#) — [Live](#)

Node.js, Express, MongoDB, Redis, JWT, Upstash QStash, Arcjet, Nodemailer, Swagger

- Built subscription tracking and renewal reminder system with automated email notifications.
- Architected scalable **RESTful API** with **JWT authentication** and **Redis caching** achieving <100ms response time.
- Implemented asynchronous job scheduling using **Upstash QStash** with monitoring and error alerting.
- Integrated **Arcjet** middleware for rate limiting 100 req/min and bot protection ensuring API security.

ACHIEVEMENTS

- **Solved 1000+ problems** across platforms
- **3 Star on CodeChef** — Max rating 1673
- **2nd Place CodeRoast** IEEE Triverse 2.0 Contest
- **2nd Place Code Arena** Geeks For Geeks Contest
